Prospect Opportunity Generator focused on aggressive exploration in politically stable and prospective regions of Europe

Investment Highlights

- Seven licenses in three European countries: Portugal, Kosovo, Germany.
- 1 JV, in Portugal; 1 JV in Kosovo; 3 pending JV's in Portugal
- Projects located in historic mining districts with existing or formerly-producing mines, often since pre-Roman times.
- All areas have strong geological potential for discovery of further economic metal deposits.
- Shareholder value created through development of project portfolio to joint venture or sell to larger mining-oriented companies.
- For every C\$ raised, we can spend more than C\$1.50 on exploration due to JV partner funding
- Strong, dedicated management team with discovery track record and extensive experience from exploration to development

RECENT DEVELOPMENTS

PORTUGAL

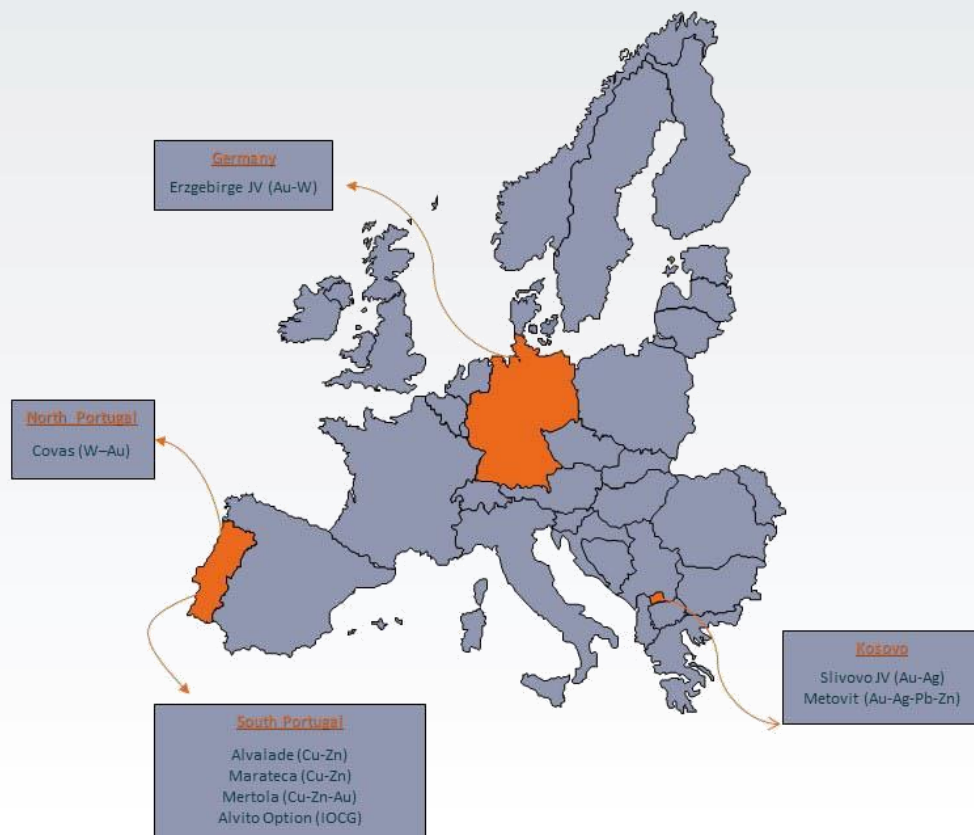

- Avrupa receives Letter of Intent from North American miner to form new JV's on three licenses in the Pyrite Belt of Portugal.
- Drilling starts on Alvito license, funded by partner OZ Minerals
- Avrupa identifies brownfields/development opportunities in the Caveira-Lousal-Sesmarias District, Alvalade license.

KOSOVO

- Avrupa close to threshold of converting to 2% NSR at Slivovo.
- Work at Metovit Project continues.

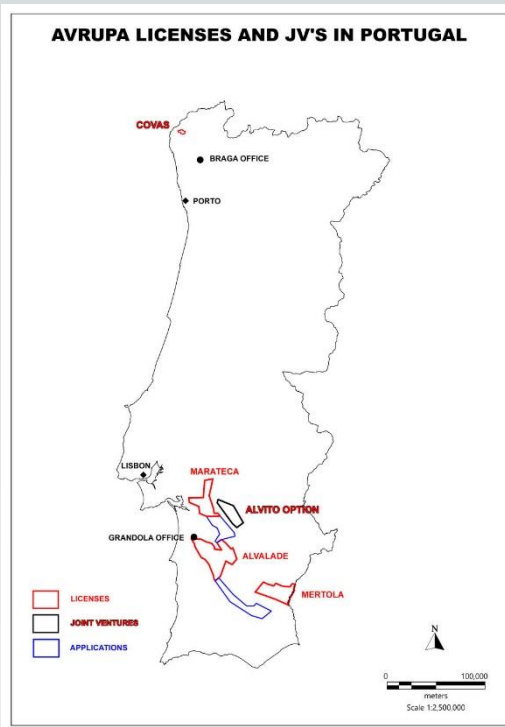

CORPORATE

- \$550,000 financing completed – March 2018.

PORTUGAL

5 licenses – 2,911 km² – 2 JV's

Avrupa operates one joint venture in Portugal:

- The **Alvito Option Agreement** with OZ Minerals. The 300 km² license is located in the *Ossa Morena Zone* of south Portugal, immediately adjacent to the *Pyrite Belt* terrane. Drilling is underway at the **Alcaçovas IOCG target** with 15 holes and a total of 2,100 meters planned for Q2 2018.

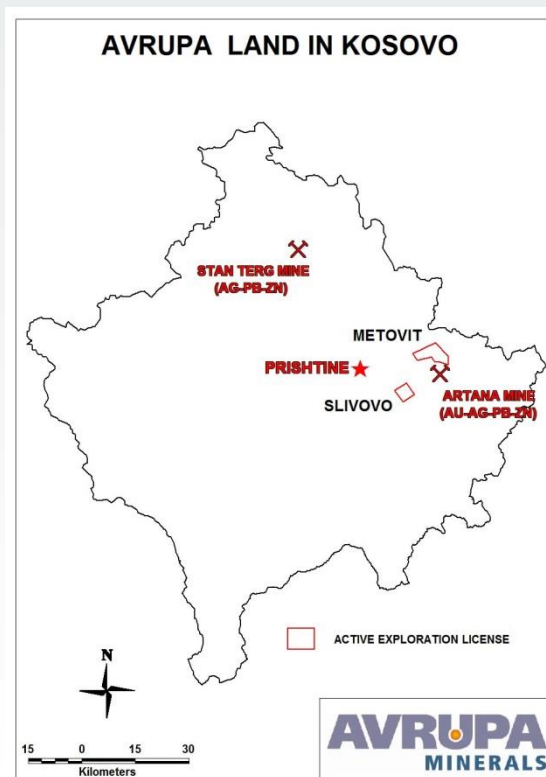

Avrupa holds three Pyrite Belt licenses in Portugal, subject to completion of JV agreements in Q2 2018 with a major North American mining company:

- New JV's include 13 million euros of exploration funding to earn-in to 51% of the three projects:
- Ongoing work in the Caveira-Lousal-Sesmarias Trend in the **Alvalade Cu-Zn Project** suggests an unique brownfields/development opportunity in a historic district. Includes two past-producing mines and recent **discovery of VMS-style mineralization at Sesmarias and Monte da Bela Vista**.
- At the **Mertola Cu-Zn Project**, The Company holds the exploration rights to potential VMS-style mineralization at the historic **São Domingos Mine** and at the **Chança Prospect**. Brownfields exploration underway.
- There are at least ten VMS targets in the **Marateca Cu-Zn Project**. Scout drilling at the **Pego do Altar Gossan** shows that surface mineralization continues downdip. Greenfields exploration continuing.

KOSOVO

2 licenses – 47 km² – 1 JV

- Licenses located in the historically prolific (Ag-Pb-Zn) Vardar Zone.
- Drilling at the **Slivovo Gold Project** completed for 2017. Geo-structural model at Slivovo being updated with new targets developed. Partner spending continues, allowing Avrupa to approach threshold of dilution level to 2% NSR.
- Metovit** covers a porphyry mineral target, and is located in geological terrane similar to that of Slivovo. First-pass geochemical sampling completed. Sample results suggest base metal and gold target areas. Follow-up work planned for Q2/3 2018.
- Developing a new generative program for Kosovo; strategic partnership available.

GERMANY

1 license – 307 km²

- Gold, tin, and cobalt to be the focus of exploration in the **Erzgebirge Mining District** in the eastern German province of Saxony.
- Potential for a new gold district with the target being large, bulk-tonnage deposits related to granitic intrusions similar to Fort Knox, Dublin Gulch, and others in the Tintina Gold Belt.
- Avrupa and partner Beak Consultants are the only group in the area exploring for gold. Others exploring for tin and base metals.
- Funded more than € 140,000 of exploration work to earn-in to 85% of the Oelsnitz Project to form the Erzgebirge JV
